Economic growth in Asian economies surprised to the upside in 2007 and 2009 and to the downside in 2008

percent GDP growth in Asia, excluding Japan
(annual expectations)

Note: Starting in January of each year, each line shows the expected forecast of GDP growth for the specified calendar year, which tends to move toward the actual realized growth outcome as the year progresses. Expectations continue to evolve into the next calendar year as revised GDP data become available (e.g., 2007 GDP expectations are revised even during 2008).

OPEC production often acts to balance the oil market. Cuts in OPEC production targets tend to lead to price increases.

Sources: U.S. Energy Information Administration, Thomson Reuters

During 2003-2008, OPEC's spare production levels were low, limiting its ability to respond to demand and price increases

Source: EIA Short Term Energy Outlook (June 2011), Thomson Reuters

The years 2003-2008 experienced periods of very strong economic and oil demand growth, slow supply growth and tight spare capacity

Sources: EIA Short Term Energy Outlook (June 2011), Thomson Reuters

Inventory builds go hand-in-hand with increases in future oil prices *relative to* current prices (and vice versa)

Sources: U.S. Energy Information Administration, Thomson Reuters

Open interest in crude oil futures grew over the last decade as more participants entered the market

average daily open interest in crude oil futures
number of contracts (thousands)

Source: Bloomberg

U.S. exchange-traded short positions by physical participants (producers, merchants, processors, and end users) consistently exceed longs

number of contracts (thousands)

Source: CFTC Commitment of Traders

Money managers tend to be net long in the U.S. oil futures market

number of contracts (thousands)

Source: CFTC Commitment of Traders

Crude oil plays a major role in commodity investment

2011 Target Weights of the Dow Jones - UBS Commodity Index

Source: Dow Jones Indexes, CME Group

Commodity index investment flows have tended to move together with commodity prices

percent changes (year-on-year)

Source: CFTC Special Call Report

Correlations between daily futures price changes of crude oil and other commodities generally rose in recent years

Note: Correlations computed quarterly

Correlations between daily returns on crude oil futures and financial investments have also strengthened

* U.S. Dollar Index (DXY), which is a weighted index of a basket of currencies, per U.S. dollar. As the dollar strengthens against other currencies, the value of the index rises.

** U.S. Treasury is based on the negative of the change in yield on 30-year U.S. government bonds because as yields rise, bond prices fall.

Note: Correlations computed quarterly
